SUMMARY

- **7.5+ years in SDLC Insights, DevSecOps consulting and solutions engineering**, advising C-Suite and Engineering leaders at S&P 500 and top Fortune 50 enterprises (Financial Services, Insurance, Telecom, Healthcare) **on safer, more maintainable software**.
- **Technical pre-sales**: led discovery, demos, POCs and evaluations for Developer Performance Insights (**Productivity and Code Maintainability**), **Software Composition Analysis** and **GenAI** use cases; drove multiple **£1M+ ARR** deals across EMEA & US in partnership with AEs by quantifying pain, aligning to business metrics and proving measurable outcomes.
- 7.5+ years of experience in evangelizing code quality, maintainability and **Clean as You Code practices**; demonstrated how **static source code analysis** and design anti-pattern detection reduce defects and mitigate **AI-assisted development risks** (supported by [whitepaper](#), [podcast](#), workshops and [webinars](#)).
- Uncovered and quantified the business impact of recurring outages and rising defects across **global financial-services and insurance enterprises (\$9B–\$48B+ revenue; 28K–65K+ employees)**, leading technical discovery, solution design, and POCs to flag **maintainability anti-patterns and code smells**. Reduced bug frequency by 45% through refactoring to introduce design patterns in most unmaintainable files and enforcing vendors to ensure code meets maintainable levels before handover.
- Hands-on with **SonarQube / SonarCloud**, GitHub Advanced Security, CI/CD, cloud platforms (AWS, Azure, GCP) and enterprise codebases; regularly bridges Sales, Product and Engineering to translate **technical capabilities into commercial impact**.

TECHNICAL SKILLS

Software Development (C#); **Scripting** (Python & R); **Databases** (SQL, PSQL); **Machine Learning & AI** (Supervised, Unsupervised, Gradient Boosting, Reinforcement Learning); **Data Visualizations** (Tableau, Microsoft PowerBI); **DevOps** (CI/CD, Pipelines, Testing); **Cloud** (AWS, GCP & MS Azure)

TOOLS

Version Control: GitHub, GitLab, Bitbucket, Azure DevOps, Code Reviews; **Code Quality & Security**: BlueOptima, SonarQube, SonarCloud APIs, GitHub Advanced Security, BlueOptima Secrets & Vulnerability Detection; **Artifactory & Release Management**: Jenkins, JFrog Artifactory, CI/CD Release Pipelines, Packaging and Deployment to Linux environments; **Cloud**: AWS, MS Azure, GCP

PROFESSIONAL EXPERIENCE

BlueOptima

Lead Analytics Consultant

London, UK

Oct 2022 – Present

BlueOptima provides software development analytics to help engineering managers and leadership measure and improve developer productivity and code maintainability. Its SaaS platform is utilized by 4 of the world's top 10 banks, 6 of the S&P top 50 companies, and 12 of the Fortune 50.

- **Lead the DevOps Professional Services function**, reporting to the Global Head of Data Engineering and serve as the sole solutions engineer for the Sales teams. Own the technical pre-

sales, solution strategy, client delivery, and post-sale consulting engagement across **40+ enterprise customers globally**.

- Responsible for driving technical consulting revenue through upsell and cross-sell, having achieved **3x and 2x annual revenue targets** in the preceding two financial years.
- Partner with Account Executives to qualify opportunities, **quantify customer pain**, lead **technical discovery**, and **shape solutions** that demonstrate **customer value**, accelerate deal closure, and result in actionable Statements of Work.
- Designed an anti-pattern detection solution and demonstrated that the presence of design anti-patterns and current maintainability state across **537K+ repositories (333 organisations)** are strongly correlated with future maintainability. Showed that moving a 10-developer team from **Good (>91%) to Best (≥97%) maintainability** delivers **~\$152K in annual capacity-cost savings** and used these insights to advocate **Clean as You Code practices** embedded in development and code review.
- Led **customer QBRs on AI-assisted and agentic development**, quantifying a 4.71% rise in unmaintainable code (vs 1.70% under traditional development) and demonstrating the need for development-time quality controls to mitigate AI-driven software risks.
- **Partner with Customer Success globally** to advise enterprise customers on **DevOps transformation, software risk, code quality, and AI-assisted development**, translating business and technical challenges into solution strategies that drive adoption, improve account health, and increase **customer lifetime value**.
- Regularly deliver **technical enablement** to revenue teams on latest research, product capabilities and emerging use cases, equipping them to drive stronger customer conversations; feed validated customer needs into **Product roadmap priorities**.

BlueOptima
Senior Analytics Consultant

London, UK
Sep 2020 – Oct 2022

- **Served as Interim Head of Data Science Consultancy for 8 months**, leading a team of 9 consultants delivering advanced analytics solutions for leading U.S. financial institutions. Directed technical strategy and delivery while partnering **with C-suite stakeholders** to align data science initiatives with strategic business outcomes.
- Delivered the **Drivers of Performance programme for Credit Suisse**, analysing telemetry from **6 engineering data sources** including BlueOptima, Jira, Jenkins and SonarQube to uncover bottlenecks, quantify performance opportunities, and align improvement priorities with engineering outcomes, contributing to a **15% increase in developer productivity within 9 months**.
- Contributed to the development of CodeLedger, an automated software capitalization reporting solution that classifies software development costs as CapEx or OpEx in compliance with IFRS and US GAAP, **reducing finance team reconciliation effort from an average of 22 days per year to 2 days**.

BlueOptima
Analytics Consultant

London, UK
Jan 2019 – Sep 2020

- **Partnered with Citi's technology division** to translate data science insights into executive dashboards and performance-management capabilities, improving leadership visibility into software engineering performance and enabling data-driven management of development teams.
- **Authored and delivered an Agile Adoption Report** that translated enterprise-wide analytics into actionable recommendations, influencing centralized tooling improvements and triggering major organisational Agile training initiatives to accelerate adoption and improve engineering practices.

EDUCATION

Brunel University London, *MSc. Data Science & Analytics* 2017 – 2018
Thesis: Anomaly Detection in Cyber Security through Machine Learning

Bahria University Pakistan, *BSc. Software Engineering* 2013 – 2017
Specialization: Artificial Intelligence

Certificates

MIT Sloan School of Management, *Negotiation & Influence* 2022
Via Emeritus

Pakistan Engineering Council, *Transaction Patterns & Universal Data Models* 2015
